

IDNG-MG

Datasheet

Master gateway

Ref. IDNG-MG

General features

TCP/IP Master gateway for the control of Normalink installations. Configuration through the webserver (Included). Once connected to the same local network than the rest of Normalink devices, the Master Gateway will take over and control the installation, allowing:

- Remotely control the installation through the Normalink Cloud service.
- Locally control the installation.
- Configure notifications.
- Comprehensive control of the installation thanks to the Normalink BMS software with drawings (included in the Gateway).
- Control the installation from an external software with Modbus IP support.
- Normalux DALI wireless.
- Tunable white support.
- DIN Rail mounting (12 modules).
- 110-230V AC 50-60Hz from an UPS (Uninterrupted Power Supply).

Sede central / Headquarters

Parque Tecnológico de Asturias. C/ Ablanal, 1
33428 Llanera (Asturias).
